

Mattia Sensi

Caritro postdoctoral fellow at Università degli Studi di Trento

Università degli Studi di Trento
Via Sommarive 14, 38123 Povo (Trento) - Italy

Email: mattia.sensi@unitn.it
Website: mattiasensi.github.io
LinkedIn: [Mattia Sensi](#)

EDUCATION

- Ph.D. in Mathematics**, *cum laude*, Università degli Studi di Trento. November 2017 – January 2021
Thesis: “A Geometric Singular Perturbation approach to epidemic compartmental models”
Supervisor: [Prof. Andrea Pugliese](#)
- M.Sc. in Mathematics**, Universiteit van Amsterdam. September 2015 – June 2017
Thesis: “Homoclinic vegetation stripes in a Klausmeier-Gray-Scott model”
Supervisor: [Prof. Dr. Arjen Doelman](#)
- B.Sc. in Mathematics**, Università degli Studi di Padova. September 2011 – September 2014
Thesis: “Portfolio optimization for quadratic utility function with partial information”
Supervisor: [Prof. Wolfgang J. Runggaldier](#)

EMPLOYMENT

- Postdoctoral researcher in Mathematics**, Università degli Studi di Trento. March 2025 – present
[Caritro postdoctoral fellow](#), Principal Investigator. Working in the group of [Prof. Andrea Pugliese](#), researching the project “*Modelli matematici di malattie infettive più ospiti e popolazioni eterogenee: applicazioni all’influenza aviaria*” (Mathematical models of infectious disease spreading in multi-host and heterogeneous populations: applications avian flu).
- Postdoctoral researcher in Mathematics**, Politecnico di Torino. March 2023 – February 2025
Postdoctoral researcher in the group of [Prof. Andrea Tosin](#), as part of PRIN 2020 project “*Integrated Mathematical Approaches to Socio-Epidemiological Dynamics*” (No. 2020JLWP23, CUP: E15F21005420006).
- Postdoctoral researcher in Mathematics**, Inria at Université Côte d’Azur. December 2021 – February 2023
Postdoctoral researcher in the group [MathNeuro](#), led by [Prof. Mathieu Desroches](#).
- Postdoctoral researcher in Mathematics**, TU Delft. March – November 2021
Postdoctoral researcher in the group [NAS](#), led by [Prof. Piet Van Mieghem](#).

1. **H. Jardón-Kojakhmetov, C. Kuehn, A. Pugliese and M. S..** *A geometric analysis of the SIR, SIRS and SIRWS epidemiological models*. Nonlinear Analysis: Real World Applications, 2021, 58, 103220

GRANTS & AWARDS

- [Progetti Giovani GNFM 2025](#) with the project “*Analisi geometrica della diffusione spaziale di epidemie su più scale temporali*” (Geometric analysis of the spatial diffusion of epidemics on multiple time scales), coordinated by Rossella Della Marca, from August 2025 to July 2026. Participant, 2000 €
- [Caritro postdoctoral fellowship 2024](#) with the project “*Modelli matematici di malattie infettive più ospiti e popolazioni eterogenee: applicazioni all’influenza aviaria*” (Mathematical models of infectious disease spreading in multi-host and heterogeneous populations: applications to avian flu), from March 2025 to February 2027. Principal investigator, 85000 €

SOFTWARE

Microsoft Office tools, L^AT_EX, Matlab, Wolfram Mathematica, Python, C.
In particular: mathematical modelling of biological phenomena (epidemic spreading, ecology, neuroscience, ...) through differential equations and random processes.

LANGUAGES

Italian (mother tongue), English (C1), French (basic).
